positive results for life™

Shiley™ XLT Extended-Length Tracheostomy Tubes

FEATURES

- Choose extra length in the proximal or distal portions to accommodate different anatomical challenges.
- Disposable inner cannula is flexible to conform to the outer cannula to further facilitate proper fit.
- Unique locking ring fastens the inner cannula securely to the outer cannula.

Trusted for exceptional quality and design, Shiley has been the leading brand of disposable tracheostomy tubes for nearly four decades.

INNOVATIVE, EXTRA-LONG TUBES FEATURE FLEXIBLE FIT AND DISPOSABLE INNER CANNULAS.

Unusual anatomies offer unique challenges. Patients with full or thick necks as well as those with long tracheal anatomies, tracheal stenosis or malacia may require extra-long tracheostomy tubes in order to achieve a proper fit. The flexibility of Shiley™ XLT tracheostomy tubes is also helpful for its ability to conform to these types of unusual anatomies.

Extra-long and single-cannula tubes fall short. Extra-long tubes may not provide satisfactory results if the added length is distributed evenly over the entire length of the tube. Likewise, single-cannula tubes do not offer the ease of care provided by dual-cannula tubes. Shiley XLT tracheostomy tubes are unique because they provide a range of extra length where you need it and include a disposable inner cannula.

This diagram illustrates how the proximal, radial and distal measurements are determined for proper sizing.

FULL OR THICK NECK

Choose Shiley XLT with proximal extension (XLTCP or XLTUP).

LONG TRACHEAL ANATOMIES, TRACHEAL STENOSIS OR MALACIA

Choose Shiley XLT with distal extension (XLTC or XLTUD).

SHILEY™ XLT EXTENDED-LENGTH TRACHEOSTOMY TUBES

- Four adult sizes, cuffed and cuffless, with proximal or distal extension
- Flexible, disposable inner cannula conforms to outer cannula shape
- Unique twist-lock mechanism easily secures inner cannula
- Flexible, thermosensitive outer cannula more readily adapts to unusual anatomies
- Outer cannula tip-to-tip radiopaque line facilitates proper tube positioning
- Flexible, soft, free-swiveling neck flange improves patient comfort and provides easy inspection of stoma site. Labeled with I.D., O.D., length, proximal or distal, cuffed or cuffless
- High volume, low pressure cuff meets all published cuff criteria
- ISO sizing matches actual I.D. of inner cannula
- 100% latex free

ORDERING INFORMATION

Description							Catalog Number		
Extension	I.D.	O.D.	Total Length	Proximal Length	Radial Length	Distal Length	Cuffed	Cuffless	Disposable Inner Cannula
Distal	5.0 mm	9.6 mm	90 mm	5.0 mm	37.0 mm	48.0 mm	50XLTC	50XLTD	50XLTI
Proximal	5.0 mm	9.6 mm	90 mm	20.0 mm	37.0 mm	33.0 mm	50XLTP	50XLTU	50XLTI
Distal	6.0 mm	11.0 mm	95 mm	8.0 mm	38.0 mm	49.0 mm	60XLTC	60XLTD	60XLTI
Proximal	6.0 mm	11.0 mm	95 mm	23.0 mm	38.0 mm	34.0 mm	60XLTP	60XLTU	60XLTI
Distal	7.0 mm	12.3 mm	100 mm	12.0 mm	39.0 mm	49.0 mm	70XLTC	70XLTD	70XLTI
Proximal	7.0 mm	12.3 mm	100 mm	27.0 mm	39.0 mm	34.0 mm	70XLTP	70XLTU	70XLTI
Distal	8.0 mm	13.3 mm	105 mm	15.0 mm	40.0 mm	50.0 mm	80XLTC	80XLTD	80XLTI
Proximal	8.0 mm	13.3 mm	105 mm	30.0 mm	40.0 mm	35.0 mm	80XLTP	80XLTU	80XLTI

Tracheostomy tubes 1/box, disposable inner cannula 10/box. Supplied with both cotton twill tape and adjustable tracheostomy tube holder (TTH).
